

English

- The student practiced communication skills by engaging in conversation with their mother through Roblox's chat function.
- They likely improved their spelling and grammar as they typed out messages to converse with their mother.
- Using the chat function encouraged the student to express their thoughts and ideas clearly in written form.
- The activity might have also sparked creativity as the student formulated messages to communicate effectively within the game.

IT

- The student gained hands-on experience using the chat function, learning how to send messages and interact within the game.
- They potentially learned about online safety and responsible internet use, as chatting in online games often requires knowledge of appropriate behavior and language use.
- The activity exposed the student to user interface and interaction design within a digital gaming environment.

Continued development related to this activity could involve introducing the student to other online gaming environments with chat functions, allowing them to practice digital communication skills in various contexts. Additionally, discussing online safety and etiquette during gaming sessions can help the student understand the importance of responsible online behavior.
