Science

- Explored the concept of matter and dust as particles that can be removed through cleaning.
- Learned about the properties of different surfaces and how they attract dust.
- Understood the importance of cleanliness in maintaining a healthy living environment.

Social Studies

- Explored societal norms and expectations related to cleanliness.
- Learned about the role of cleanliness in different cultures and communities.
- Understood the environmental impact of regular cleaning practices.

Tips

Engage the student in setting dusting goals to track progress and maintain motivation. Encourage them to research DIY natural cleaning solutions and create eco-friendly dusting cloths using old materials. Incorporate role-playing scenarios where the student can pretend to be a cleaning consultant providing dusting tips to others. Finally, make dusting a team activity by assigning different areas of the house to family members and turning it into a fun competition with rewards for the most thorough dusting job.
