

Core Skills Analysis

Fine Motor Skills

- The 4-year-old student demonstrated hand-eye coordination while drawing and making scribbles on the blackboard.
- By using chalks of different colors, the student practiced grasping and manipulating small objects, improving their fine motor skills.
- The activity helped in developing the student's finger strength and control as they wrote some letters on the blackboard.
- Through this activity, the student improved their dexterity and precision in handling chalk to create various drawings and scribbles.

Tips

To further enhance fine motor skills development in young children, consider providing them with a variety of art materials like crayons, markers, and playdough. Encourage activities that involve cutting, tearing, and pasting to strengthen hand muscles. Incorporating games like threading beads or building with blocks can also help improve hand-eye coordination and fine motor skills.

Book Recommendations

- [Beautiful Oops!](#) by Barney Saltzberg: This interactive book encourages children to embrace mistakes and turn them into something beautiful, fostering creativity and fine motor skills.
- [Harold and the Purple Crayon](#) by Crockett Johnson: Follow Harold's imaginative journey with his purple crayon, inspiring children to explore creativity through drawing and storytelling.
- [Press Here](#) by Herve Tullet: A whimsical book that invites children to interact with dots on the pages, encouraging fine motor skills and imaginative play.
