

## Core Skills Analysis

### Mathematics

- The 7-year-old student practiced addition and subtraction while calculating the values of properties and money cards in the game.
- Understanding of basic multiplication as they were required to multiply values for rent and debts during gameplay.
- Improved strategic thinking and decision-making skills through budgeting and managing resources effectively.
- Developed critical thinking by strategizing to maximize property acquisitions and set collection goals.

### Social Studies

- Learned basic economic concepts such as buying, selling, and trading.
- Understanding of property ownership and the concept of rent and mortgage payments.
- Developed negotiation skills by engaging in trade and deals with other players.
- Explored concepts of fairness and ethical decision-making in the context of gameplay.

### Tips

To enhance learning through Monopoly Deal, encourage the child to create their own custom cards or properties, introducing new rules and challenges. This fosters creativity, critical thinking, and adaptability while adding a personalized touch to the game experience.
