

## Core Skills Analysis

### Sensory

- The 3-year-old student enhanced their tactile sense by feeling the different textures of the paper while scribbling.
- Scribbling helped in improving the child's hand-eye coordination as they tried to control the movement of the crayon or pencil on the paper.
- Through scribbling, the student explored their sense of sight by observing the colorful marks they created on the paper.
- The activity of scribbling also stimulated the child's sense of creativity and imagination as they expressed themselves through lines and shapes.

### Tips

To further develop sensory skills following a scribbling activity, encourage the child to explore different materials such as sand, play dough, or textured fabrics. Provide opportunities for messy play to engage all senses. Offer varied tools like chalk, paint, or markers for different sensory experiences. Encourage outdoor activities to let the child experience natural textures like grass, sand, and pebbles. Engage in sensory-focused games like hide-and-seek using auditory and tactile clues. Remember to praise and encourage the child's exploration and creativity.

### Book Recommendations

- [Beautiful Oops!](#) by Barney Saltzberg: This interactive book encourages children to turn mistakes into something beautiful, promoting creativity and resilience.
- [Press Here](#) by Herve Tullet: A delightful interactive book that engages young readers through imaginative play with colors, shapes, and movement.
- [I Ain't Gonna Paint No More!](#) by Karen Beaumont: A fun and colorful book about a child who can't resist painting everything in sight, celebrating self-expression and creativity.
