

## Core Skills Analysis

### English

- The 8-year-old student demonstrated an understanding of common and proper nouns by categorizing objects and people around them.
- Through the activity, the student showed improvement in recognizing abstract nouns by discussing emotions and feelings.
- The student grasped the concept of collective nouns by identifying groups of animals or people in the context of the activity.
- By engaging in dialogue during the activity, the student practiced using possessive nouns correctly when describing ownership.

### Tips

For continued development after the 'Nouns' activity, encourage the student to create their own story using a variety of nouns to practice identification and usage. Incorporating nouns in everyday conversations and playing word association games can help reinforce their understanding of different types of nouns. Encourage the student to keep a noun journal where they list new nouns they encounter daily, helping them expand their vocabulary and recognition of nouns in context.
