

## Core Skills Analysis

### Geography

- The student learned about different countries, continents, and landmarks by exploring various locations on Google Maps.
- They developed a basic understanding of directions, such as north, south, east, and west, by navigating through the map.
- They gained knowledge about distance and proximity by comparing the locations of different places on the map.
- The activity sparked interest in geography and exploration, leading to questions about different cultures and environments.

### Mathematics

- The student practiced counting and numerical skills by calculating distances between different locations on the map.
- They learned about measurement units like kilometers or miles while exploring the scale on the map.
- The activity introduced basic math concepts like addition and subtraction as the student compared distances or estimated travel times.
- They applied practical problem-solving skills by planning routes and understanding the concept of time zones.

### Tips

To further enhance the learning experience related to Google map addresses, encourage the student to create their own imaginary world map with unique landmarks and countries. This could involve drawing and labeling their map, creating stories or adventures based on the locations, and even incorporating elements of math by measuring distances between their invented places. Additionally, consider incorporating real-life geography quizzes or challenges using Google Maps to test their knowledge and navigation skills.

### Book Recommendations

- [Maps](#) by Aleksandra Mizielska and Daniel Mizielski: This beautifully illustrated book introduces children to different cultures, landmarks, and geographical features around the world through detailed maps.
- [Follow That Map!: A First Book of Mapping Skills](#) by Scot Ritchie: This interactive book offers engaging activities and lessons on map reading and navigation, perfect for young learners exploring the concept of maps.
- [Me on the Map](#) by Joan Sweeney: Through a simple and relatable story, this book helps children understand their place in the world, starting from their own room to the broader scope of the globe.
