

Core Skills Analysis

Drama

- The 14-year-old student learned the importance of body language while creating characters for the tableau.
- Through the activity, the student grasped the concept of non-verbal communication and its role in storytelling.
- By experimenting with different facial expressions and gestures, the student enhanced their understanding of conveying emotions effectively in a tableau.
- The tableau activity helped the student explore group dynamics and collaboration in creating a cohesive narrative.

Tips

Engaging in activities like creating tableaus can greatly benefit young learners by enhancing their creativity, teamwork, and communication skills. To further develop these skills, encourage students to explore different themes and characters, experiment with varied emotions and body postures, and provide opportunities for reflection and feedback on their tableau performances.
