

## Core Skills Analysis

### History

- The 14-year-old student will have gained a deep understanding of the Aztec civilization, including its social structure, religious practices, and daily life.
- They will have developed research skills while gathering information for the presentation, learning how to differentiate between credible and unreliable sources.
- Creating the presentation would have improved their organization and time management skills as they structured the information effectively and met the deadline.
- The activity likely sparked an interest in ancient civilizations and historical research, encouraging the student to explore more topics within the subject of history.

### Tips

To further enhance the learning experience and creativity, the student can consider incorporating interactive elements like quizzes or virtual tours related to the Aztecs. Additionally, they could explore incorporating multimedia elements such as videos or audio clips to make the presentation more engaging and informative. Encouraging peer feedback or presenting to a wider audience can also boost confidence and presentation skills.
