

Core Skills Analysis

Art

- Developed hand-eye coordination by aiming and hitting the nails with the hammer.
- Explored the concept of texture through the sound and feel of the hammer on different surfaces.
- Enhanced creativity by creating unique patterns or designs while hammering.
- Introduced concepts of cause and effect as they observed the nail going into the surface after hammering.

Tips

For continued development, consider incorporating different materials such as soft foam sheets or playdough for hammering to explore textures further. Encourage the child to experiment with varying force when hammering to discover how it impacts the end result. Additionally, provide different shapes of nails or objects to hammer for a varied sensory experience.
