

Core Skills Analysis

Outdoor Education

- Developed navigation skills by following clues to find hidden eggs.
- Enhanced observation skills by searching for different types of eggs in various locations.
- Improved teamwork and social skills by working with friends to solve riddles and find eggs.
- Learned about nature and the environment while exploring the local park during the hunt.

Physical Education

- Engaged in physical activity by running and searching throughout the park.
- Improved coordination and agility while moving quickly to find eggs.
- Enhanced endurance by participating in a prolonged outdoor activity.
- Learned the importance of staying active and healthy through the fun-filled hunt.

Tips

To further enhance the learning experience from the Easter hunt with friends in a local park, encourage the student to create their own scavenger hunts for family or friends, incorporating educational elements such as history or science facts. Additionally, they can practice map-reading skills by planning routes for future outdoor adventures. Engaging in similar activities regularly can promote problem-solving abilities, foster creativity, and strengthen friendships.
