

Core Skills Analysis

Art

- The student learned about colors, shapes, and patterns while designing the Pokemon cards.
- Through this activity, the student practiced creativity and imagination by coming up with unique designs for each Pokemon card.
- Creating Pokemon cards involved fine motor skills as the student cut and pasted different elements to make the cards visually appealing.
- The student also learned about proportions and symmetry while designing the characters on the cards.

Design

- During the activity, the student gained understanding of layout and composition by arranging the different elements on the Pokemon cards.
- The student applied problem-solving skills to determine the best way to represent each Pokemon on the card within limited space.
- By considering the characteristics of each Pokemon, the student practiced thematic design and cohesion in creating a set of cohesive cards.
- Through feedback and iteration, the student improved their designs, showcasing the iterative nature of the design process.

Tips

For continued development, encourage the student to explore different art mediums such as watercolors or colored pencils to add variety to their Pokemon card designs. Encourage them to experiment with texture by incorporating elements like glitter or fabric for a tactile experience. Additionally, prompt the student to create a backstory or special ability for each Pokemon card, fostering storytelling and character development skills.
