

Core Skills Analysis

English

- The student practiced communication skills by interacting with customers and explaining the products for sale.
- Enhanced vocabulary through labeling items like 'cupcakes,' 'cookies,' and 'brownies' for the sale.
- Improved writing skills by making colorful posters with catchy phrases to attract buyers.

Math

- Developed basic math skills by counting money received from sales and giving change to customers.
- Practiced addition and subtraction when calculating the total amount earned from different items sold.
- Understood the concept of pricing and profit margin by setting prices for each baked good.

Social Studies

- Learned about entrepreneurship and the concept of a small business through organizing a bake sale.
- Explored cultural diversity by offering treats from various cultures, showcasing different traditions through food.
- Understood the community's role by donating part of the earnings to a local charity, fostering a sense of civic duty.

Tips

To further enhance learning from the bake sale activity, encourage the student to create a budget for future sales, conduct market research to understand customer preferences, and explore the history of baked goods in different cultures. Additionally, organizing themed bake sales can introduce new learning opportunities on topics like seasons, holidays, and celebrations.
