

Core Skills Analysis

Art

- Through playing with perler beads, the student can enhance their fine motor skills as they carefully place each bead on the pegboard.
- Creating designs with perler beads can help the student improve their creativity and imagination as they experiment with different color combinations and patterns.
- The activity of sorting and organizing perler beads by color can aid in developing the student's organizational skills and ability to categorize.
- By following patterns or creating their own designs, the student can improve their attention to detail and focus.

Tips

Engage the student in brainstorming sessions prior to the activity to encourage them to come up with unique designs. Encourage them to showcase their finished perler bead creations by framing them or using them as decorations.
