

## Art

- The toddler-grade child can learn about colors and textures through the illustrations in the book.
- They can also explore different ways to create art by using their imagination to visualize the story.

In order to continue developing their artistic skills, the child could try creating their own illustrations for the different parts of the story. They can use various materials like paints, markers, or colored pencils.

## English Language Arts

- The child can learn about storytelling and the elements of a narrative through the book.
- They can practice listening and comprehension skills while following the story.

To further their language arts development, the child can try writing their own version of the story, adding their own twists and characters.

## Foreign Language

- The child can practice vocabulary related to animals and body parts in their target foreign language.
- They can also learn about different cultural perspectives and storytelling traditions.

To continue developing their foreign language skills, the child can try reading or listening to the story in their target language, if available. They can also find other books in the same foreign language to explore different stories and vocabulary.

## History

- The child can learn about the history of mice and their relationship with humans.
- They can also explore how different cultures have depicted mice in their folklore and art.

To further their historical understanding, the child can research famous mice in history and create a presentation or artwork showcasing their findings.

## Math

- The child can practice counting and number recognition through the repetition of counting seven mice.
- They can also explore patterns and sequencing through the different perspectives of the mice.

To continue developing their math skills, the child can use toy mice or drawings to act out the story, counting and arranging them in different patterns.

## Music

- The child can learn about rhythm and melody through the repetition of the book's text.
- They can also explore the concept of harmony by imagining how each mouse's perspective contributes to the overall story.

To further their musical development, the child can create a song or chant inspired by the story, using different pitches and rhythms to represent each mouse's viewpoint.

## Physical Education

- The child can engage in physical activity by pretending to be a mouse and imitating their movements described in the book.
- They can also practice coordination and balance by reenacting the mice's exploration of their surroundings.

To continue incorporating physical education, the child can play a game of "Mouse Tag" or create an obstacle course inspired by the story.

## Science

- The child can learn about the five senses and how they are used by the mice to understand the world around them.
- They can also explore the concept of adaptation by considering how the mice experience their surroundings differently.

To further their scientific exploration, the child can conduct simple experiments related to the senses, such as blindfolded taste tests or sensory scavenger hunts.

## Social Studies

- The child can learn about the importance of cooperation and teamwork through the mice's different perspectives.
- They can also explore empathy and understanding by considering how each mouse's experience is valid and unique.

To continue developing their social studies skills, the child can engage in role-playing activities where each person takes on the perspective of a different mouse and discusses their point of view.

## Book Recommendations

- [Little Mouse's Big Book of Fears](#) by Emily Gravett: This book follows Little Mouse as he faces his various fears, introducing young children to different emotions and fears in an engaging way.
- [Mouse Paint](#) by Ellen Stoll Walsh: This book explores colors and mixing through the playful story of three mice who discover jars of paint.
- [If You Give a Mouse a Cookie](#) by Laura Numeroff: This classic book follows the chain of events that occurs when a generous boy gives a mouse a cookie, encouraging young readers to think about cause and effect.
