

## Core Skills Analysis

### Technology

- The student demonstrated an understanding of basic tech concepts like servers and internet connectivity through setting up Discord.
- They developed problem-solving skills by troubleshooting potential issues with Discord installation or server setup.
- The activity likely sparked an interest in coding or software development as they explored Discord's customization options.
- Through moderating a Discord server, the student practiced responsible online behavior and digital citizenship.

### Communication

- The student improved their written communication skills by interacting with others via text chats on Discord.
- They honed their ability to convey thoughts clearly and concisely in online conversations and announcements within the Discord server.
- Participating in voice chats on Discord helped the student enhance their verbal communication skills.
- Managing different channels on Discord encouraged the student to organize information effectively for different purposes.

### Tips

Engage the child in setting up different kinds of Discord channels based on their interests, such as gaming, book discussions, or arts and crafts. Encourage them to explore Discord bots and moderation tools to learn more about automation and online safety. Foster collaboration by inviting friends or family members to join the server and engage in various activities together. Regularly discuss online etiquette and privacy concerns to ensure the child develops healthy digital communication habits.

### Book Recommendations

- [How to Code: A Step-By-Step Guide to Computer Coding](#) by Max Wainewright: An interactive guide that introduces coding concepts in a straightforward manner, perfect for young beginners interested in technology.
- [The Techy Guide: Discover the World of Technology](#) by Alex Milton: A visually engaging book that explores various aspects of technology, including communication tools like Discord, in a child-friendly way.
- [Communicating for Kids: Building Skills for Success](#) by Carol Mason: A practical guide designed to help children improve their communication skills both online and offline, with fun activities and tips.
