

Core Skills Analysis

Art

- Developed fine motor skills through the precise placement of Perler beads to create intricate 3D objects like mushrooms and flower pots.
- Enhanced creativity and imagination by designing unique patterns and color combinations for the different objects made from Perler beads.
- Learned about symmetry and patterns while creating calendar designs using Perler beads, improving understanding of visual aesthetics.
- Explored the concept of depth perception by assembling Perler bead objects in layers to achieve a 3D effect.

Tips

For continued development in using Perler beads to create 3D objects, encourage the student to experiment with different shapes and sizes of objects. They can also try incorporating other materials like wire or cardboard to add more dimension to their creations. Additionally, setting challenges such as creating specific scenes or stories with the Perler bead objects can further enhance storytelling skills and narrative development.
