

## Core Skills Analysis

### Geography

- The student learned about the states of Australia and the location of Darwin in relation to other states.
- They gained an understanding of the concept of distance and direction on a map.
- They discovered the geographical layout of Australia and how states are placed geographically.
- Exploring the map may have sparked curiosity about the different climates, landscapes, and cultures in various parts of Australia.

### Tips

Continued development after such an engaging activity can include further exploration of Australian geography through interactive online maps, watching documentaries on Australian states, or even creating a travel journal imagining a trip around Australia. Encourage the child to delve deeper into the unique characteristics of each state, fostering a deeper appreciation for the country's diverse landscape and culture.
