

Core Skills Analysis

Sensory Development

- The child has improved tactile sensory skills by feeling the texture of the broom and the ground.
- Visual sensory skills have been enhanced as the child observes the movement of dirt and leaves while sweeping.
- Gross motor skills are developed through the physical act of sweeping, improving coordination and muscle strength.
- Spatial awareness is practiced as the child learns how to navigate the outdoor space while sweeping.

Environmental Awareness

- The child gains an understanding of cleanliness and tidiness by actively participating in the cleanup process.
- An appreciation for nature and taking care of the outdoor environment is instilled through the act of sweeping.
- Learning about cause and effect as the child sees the immediate impact of their actions on the outdoor space.
- Introduction to responsibility and accountability as the child takes on a task to contribute to the outdoor area.

Tips

To encourage further development after the activity of child sweeping outdoors, consider incorporating different tools such as small rakes or brushes to add variety and keep the child engaged. Offering praise and encouragement during the task can boost the child's confidence and make them more eager to participate in similar activities. Additionally, involving the child in decision-making about where to sweep or how to organize the outdoor space can foster a sense of ownership and autonomy.
