

Core Skills Analysis

Media Literacy

- The 11-year-old student might have learned about the impact of memes on society, understanding how they can spread ideas and influence opinions.
- They could have developed critical thinking skills by discerning between humorous memes and potentially harmful ones that spread misinformation.
- Through meme videos, the student may have also gained an understanding of digital content creation and sharing.
- Watching meme videos might have sparked discussions on copyright, fair use, and the ethical use of other people's content online.

Internet Safety

- There may have been learning about the importance of online privacy and the risks of sharing personal information while engaging with meme-related content.
- The student might have learned about cyberbullying through memes and how to recognize and address such behavior.
- They could have gained knowledge about vetting online sources and verifying information found in memes.
- Watching meme videos might have prompted discussions on healthy digital media consumption habits and the importance of balance in online activities.

Tips

To further explore the concepts learned from watching meme videos on YouTube, the 11-year-old student could engage in creating their own memes with positive and inspiring messages, conduct research on the history of memes and their evolution, analyze the cultural impact of popular memes, and participate in discussions on online etiquette and responsible digital citizenship.
