## Core Skills Analysis

### Art

- Students explored ethical design in virtual spaces while capturing Pokemon, considering visual aesthetics and user engagement.
- The illustration style of various Pokemon inspired students to analyze different painting techniques and color theories.
- Students engaged in creative storytelling by designing their own Pokémon based on real-world environments and cultures encountered during their exploration.
- They developed spatial awareness and perspective drawing skills through mapping locations for PokéStops and Gym battles.

### Tips

To enhance their artistic skills, students should explore various digital art tools and platforms that allow them to create and manipulate their Pokémon designs. Furthermore, engaging in community art projects that connect street art and Pokemon Go can provide valuable real-world applications of their artistic concepts.
