

Core Skills Analysis

Art

- Developed creativity by designing and arranging the dollhouse and its furnishings.
- Learned about color schemes and aesthetics while selecting decorations.
- Engaged in spatial awareness by organizing items within the house layout.
- Experimented with different textures and materials through the use of various Barbie accessories.

English

- Enhanced vocabulary skills by naming different rooms and furniture pieces.
- Practiced storytelling by creating scenarios and dialogue for Barbie characters.
- Improved descriptive language by narrating the decoration choices.
- Learned to sequence events by planning the decoration process.

History

- Gained insight into different architectural styles by mimicking real-life houses.
- Explored historical fashion through the clothing and accessories of Barbies.
- Identified cultural elements in house decoration and design through diverse Barbie themes.
- Developed an understanding of family roles and structures by creating stories around Barbie characters.

Math

- Applied basic geometry by measuring and planning the layout of furniture in the house.
- Used counting skills to organize and categorize accessories and furniture.
- Learned about spatial reasoning through arranging items within defined spaces.
- Experimented with proportions while attempting to create scaled-down versions of real-life furniture.

Physical Education

- Incorporated movement by physically rearranging furniture and Barbie figures.
- Engaged in fine motor skills while manipulating small accessories and decorations.
- Developed coordination through the process of balancing pieces within the dollhouse.
- Participated in role-playing that encourages expressive movement and active play.

Science

- Explored concepts of stability and balance within the dollhouse structures.
- Learned about materials and their properties by selecting and using different Barbie accessories.
- Investigated themes of environmental design, including sustainability through eco-friendly house ideas.
- Discussed life skills related to caretaking within the pretend play context of the house.

Tips

To further enhance their learning experience, the student could explore more complex architectural concepts, engage in collaborative play with peers to develop social skills, and try to incorporate elements of sustainability in their decorating practices. Additionally, learning about different cultures can inspire diverse decoration styles, expanding both their knowledge and creativity. Encouraging them

to document their decorating processes through drawings or writing could also improve their communication skills and allow for reflection on their creative choices.
