

## Core Skills Analysis

### Math

- Pria practiced counting by organizing and grouping her Barbie dolls, utilizing one-to-one correspondence.
- She explored basic addition and subtraction by counting how many dolls she placed in different roles during her play scenarios.
- Pria learned about measurement concepts by using her Barbie dolls as references for height and length in her imaginary settings.
- She practiced sorting and categorizing her dolls by various characteristics (such as clothing color and accessories), which solidifies her understanding of sets.

### Tips

To further enhance Pria's learning experience, consider integrating math games that involve counting and sorting. You can create play scenarios where she needs to calculate the total number of dolls or the difference between two groups. Additionally, using measuring tapes or rulers during play can introduce her to concepts of measurement more deeply. Encourage her to create a mini 'store' with her dolls where she can practice transactions and money management, fostering both math skills and entrepreneurial thinking.
