

## Core Skills Analysis

### Art and Design

- Zelig has developed her understanding of character design by creating various Gacha Life characters, applying elements like color theory, aesthetics, and proportionality.
- She explored different styles and clothing combinations, enhancing her creativity and ability to visualize different looks and themes.
- The activity fostered her skills in digital art, as she had to navigate the app's tools and features effectively.
- By designing unique characters, she learned to express individual personalities visually, applying concepts of symbolism in art.

### Literature and Storytelling

- Creating personalities for each character encouraged Zelig to improve her narrative skills and understand character development.
- She learned the importance of backstory, as unique backstories helped her give depth to her characters.
- Zelig practiced dialogue writing through imagined interactions between characters, enhancing her written communication skills.
- The exercise increased her empathy and understanding of different perspectives by creating diverse personalities.

### Tips

To further enhance Zelig's learning experience, consider encouraging her to write short stories or dialogues featuring her Gacha Life characters, integrating lessons on narrative structure and character arcs. You could also explore other apps or tools related to character creation and storytelling to expand her digital literacy. Providing her with prompts or themes to work on can push her creativity further, while discussions about art and narrative can help deepen her understanding of those subjects.
