

Core Skills Analysis

Science

- Mona has grasped the basic concepts of astrological symbols and how they represent different personality traits, showcasing her ability to connect abstract symbols to real-life characteristics.
- She has learned to categorize zodiac signs based on their elemental groups (Earth, Air, Fire, Water), indicating an understanding of classification and grouping in science.
- Mona demonstrated curiosity about the astronomical basis of astrology and the positioning of celestial bodies, showing early skills in scientific inquiry.
- She explored how astrology can be used as a tool for self-reflection, connecting scientific concepts with personal growth and emotional understanding.

Literacy

- Mona enhanced her reading comprehension skills by engaging with texts about the different zodiac signs and their meanings, allowing her to extract key information.
- Through this activity, she practiced narrative skills by relating astrological traits to her own experiences or those of people around her.
- She expanded her vocabulary by encountering and learning the specific terminology related to astrology, demonstrating an increase in her language proficiency.
- Mona developed summarization skills through her ability to distill complex information about astrology into simpler terms she could understand.

Personal, Social and Health Education (PSHE)

- The activity encouraged Mona to reflect on her personal identity and how astrological traits might apply to her, fostering a sense of self-awareness.
- She learned to discuss her thoughts and feelings about astrology within a social context, enhancing her interpersonal communication skills.
- Mona demonstrated empathy by considering the astrological attributes of others, which may help her in understanding diverse perspectives.
- The exploration of astrology as a tool for self-reflection supports her emotional literacy, allowing her to articulate her feelings and thoughts more effectively.

Tips

To further enhance Mona's learning experience, I suggest introducing hands-on activities, such as creating a personal zodiac chart using her birthday, to deepen her understanding. Engaging with regular discussions about how astrology can influence personality traits will promote critical thinking. A relevant project could involve researching a figure known for their zodiac sign and presenting their traits and accomplishments to the family or class. Encouraging her to draw connections between astrology and scientific concepts like astronomy will enrich her learning even more.

Book Recommendations

- [Astrology for Teens](#) by Cassandra Eason: A beginner-friendly introduction to astrology, helping young readers understand their zodiac signs and what they mean.
- [Zodiac Signs: The Ultimate Guide](#) by Catherine H. Woods: This book explores the characteristics of each zodiac sign along with fun facts and activities for kids.
- [The Secret Language of Astrology](#) by Lynn McTaggart: An engaging book that presents astrology in a relatable way for kids, encouraging them to explore their own personalities through their

zodiac signs.

Learning Standards

- Science: Understanding of the solar system and the celestial bodies aligns with the National Curriculum for Key Stage 2.
- Literacy: Developing reading comprehension and vocabulary skills aligned with the English National Curriculum standards for Key Stage 2.
- PSHE: Promotes self-awareness and emotional literacy as outlined in the PSHE curriculum for Key Stage 2.
