

## Core Skills Analysis

### Geography

- Heidi learned about the key factors influencing internal migration in Australia, such as economic opportunities, climate change, and urbanization trends.
- The activity helped her understand the demographic shifts caused by migration, including population growth in urban areas versus population decline in rural regions.
- Heidi examined the impact of policies on internal migration patterns and how government decisions can encourage or discourage people from moving within the country.
- Through her exploration, she also discovered the social and cultural effects on communities, including changes in local identities and economic challenges.

### Science

- Heidi analyzed environmental factors linked to migration, such as the effects of climate change on agricultural viability and water resources in different Australian regions.
- She learned about ecological consequences of migration, like increased urban sprawl and its impact on biodiversity and habitats in developed areas.
- The activity also introduced her to the concept of sustainability, particularly how migration trends may affect resource management and urban planning.
- Heidi explored health implications related to migration, such as access to health services and the importance of considering environmental health in urban areas.

### Tips

To enhance Heidi's understanding of internal migration in Australia, it's recommended that she engages in further research regarding the historical context of migration patterns. Parents or teachers could encourage her to create a visual presentation comparing past and present migration trends. Group discussions around the social implications of migration could also deepen her understanding. Additionally, exploring related topics, like urban planning and its effects on environment and culture, could provide a holistic view. Activities such as field trips to diverse communities, researching local migration stories, or even interviewing residents from different backgrounds can enhance her practical knowledge of the subject.

### Book Recommendations

- [The Boy in the Black Suit](#) by Jason Reynolds: A poignant story of grief and identity that unfolds within a diverse community, inviting discussions about migration and belonging.
- [The Goldfish Boy](#) by Lisa Thompson: A captivating tale about connection and understanding in a modern setting, which lightly touches upon themes of change and community dynamics.
- [The Last Free Cat](#) by Megan McCafferty: A thought-provoking story that explores themes of change, adaptation, and the human experience in the face of societal shifts.

### Learning Standards

- ACHGK061: Understanding the diverse characteristics of Australian communities and how they have changed over time.
- ACSHE081: Investigating the impact of human activities on the environment and sustainability initiatives in science.
- ACHGE034: Analyzing the impact of migration on the cultural landscapes and natural environments in Australia.
