

Core Skills Analysis

Digital Literacy and Communication

- Mia learned foundational skills in setting up an online community platform by creating a Discord server, including choosing and configuring server settings.
- She practiced digital organization skills by setting up channels, roles, and permissions to structure communication effectively.
- Mia enhanced her understanding of online communication etiquette and moderation tools within a digital environment.
- She developed basic troubleshooting skills related to technology setup and user management within the Discord app.

Technology and Computer Skills

- Mia gained experience navigating a digital platform geared towards real-time communication.
- She learned how to use features such as voice, text, and video chats, and the integration of bots or plugins, depending on her server settings.
- Mia developed problem-solving skills related to configuring technical aspects of the server for intended use.
- She learned about cybersecurity basics, including privacy settings for protecting users and content.

Tips

Tips: To deepen Mia's understanding and engagement, encourage her to explore more about online community management and digital citizenship. She could experiment with creating different types of servers targeting various interests, which would help her learn about audience engagement and content moderation. Additionally, discussing the importance of cybersecurity and respectful online communication can provide a broader social context. You might also consider guiding Mia through coding simple Discord bots to automate tasks, which integrates computer programming fundamentals with her existing server management skills.

Book Recommendations

- [Digital Citizenship: Staying Safe and Responsible Online](#) by Kathy Schrock: This book introduces young learners to the principles of responsible digital communication, privacy, and safety.
- [Coding Projects in Python](#) by DK: An introductory guide for kids to start coding, which can be linked to creating simple automation or bots compatible with platforms like Discord.
- [Social Media Safety for Kids](#) by Caroline Medina: A guide focused on safe interaction and etiquette on digital platforms, helping young users navigate online social spaces.

Learning Standards

- Australian Curriculum Digital Technologies (ACTDIP016) - Design, modify and follow simple protocols for managing digital systems.
- Australian Curriculum Digital Technologies (ACTDIP020) - Plan and manage collaborative projects using digital tools.
- Australian Curriculum English (ACELY1711) - Use interaction skills to participate in structured online discussions and collaborative tasks.

Try This Next

- Worksheet: Design your own server layout with channels and rules tailored for different communities.

- Writing Prompt: Compose a code of conduct for your Discord server that promotes respectful and safe communication.

Growth Beyond Academics

Mia's experience setting up a Discord server likely fostered her independence and confidence with technology. The complexity of organizing a digital community can build problem-solving skills and persistence, while also encouraging empathy and social awareness as she considers community rules and user interaction.
