

Core Skills Analysis

Geography

- Ebony practiced identifying key geographical features and countries within North America, strengthening her regional mapping skills.
- She learned to utilize both worksheets and online research tools to gather and verify information, enhancing her digital literacy.
- Through cross-referencing data from worksheets and online sources, Ebony developed critical thinking skills to distinguish fact from opinion or incomplete facts.
- She became familiar with diverse cultural and physical aspects of North America, gaining a broader understanding of the continent's complexity.

Information Literacy

- Ebony enhanced her ability to search for reliable online information related to a specific geographic region.
- She practiced organizing researched data by correlating worksheet prompts and online findings systematically.
- She likely developed early skills in evaluating source credibility during her online investigation.
- Ebony gained experience balancing traditional paper-based learning (worksheets) and digital research, fostering flexible learning habits.

Tips

To deepen Ebony's understanding of North America, encourage her to create a detailed travel brochure highlighting major landmarks, climates, and cultural activities from different countries in the continent. Incorporate multimedia exploration by watching documentaries or virtual tours to visualize landscapes and city life, which supports sensory learning. Engage her in comparing North America with another continent to appreciate diversity and similarities, thus expanding her geographic perspective. Finally, guide her to present her findings through a short oral presentation or video, reinforcing communication skills and confidence.

Book Recommendations

- [National Geographic Kids Beginner's World Atlas](#) by National Geographic Kids: An engaging atlas that introduces young readers to continents, countries, and physical geography with vibrant photos and accessible text.
- [If You Were Me and Lived in Canada](#) by Carole P. Roman: This book offers insights into Canadian culture and daily life, providing a personal glimpse into North American diversity.
- [The Geography of North America](#) by Charles O. Smith: A well-illustrated resource explaining the physical and human geography of North America for young learners.

Learning Standards

- KS3 Geography: Locational knowledge – Pupils should locate the main countries and cities of North America, including their key physical and human characteristics (NC Geography 3a).
- KS3 Geography: Geographical skills – Use maps, atlases, globe, and digital/computer mapping to locate countries and describe features studied (NC Geography 7b).
- KS2 Computing: Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content (NC Computing 2a).
- KS2 Literacy: Retrieve, record and present information from non-fiction texts and digital sources (NC English 2b).

Try This Next

- Create a layered map project where Ebony labels physical features, countries, and capitals of North America based on her research.
- Prepare a quiz with multiple-choice and true/false questions about North American geography and culture to reinforce learning.
