

## English Language Arts

- The child learned vocabulary words related to the Yugioh game, such as "duel," "summon," and "card."
- The child practiced reading comprehension by following the instructions on the Yugioh cards.
- The child improved their writing skills by creating their own Yugioh duel scenarios and describing the actions in written form.

## Math

- The child practiced basic addition and subtraction skills by calculating the attack and defense points of their Yugioh cards.
- The child learned about probability and chance while strategizing their moves during the Yugioh duels.
- The child improved their mental math skills by keeping track of their life points and calculating the remaining points during the game.

## Science

- The child learned about various creatures and monsters through the Yugioh card descriptions, expanding their knowledge of different species.
- The child gained an understanding of elemental attributes (such as fire, water, earth, etc.) and their interactions based on the Yugioh card mechanics.
- The child developed critical thinking skills by analyzing the effects and abilities of different Yugioh cards, considering their scientific implications.

Continuing to develop skills related to the Yugioh activity can be done by encouraging the child to explore the Yugioh universe further. They can engage in creative writing by inventing their own Yugioh cards with unique abilities and backstories. Additionally, the child can research more about the creatures and monsters featured in the game, allowing them to deepen their understanding of different mythologies and folklore.
