

Art

- The child learned to identify different natural materials such as leaves, flowers, and sticks.
- The child learned to use their imagination and creativity to arrange and glue the materials onto the collage.
- The child learned about different colors and textures found in nature as they selected and arranged the materials.
- The child learned about composition and balance as they thought about the placement of the materials on the collage.

Physical Education

- The child practiced their fine motor skills while picking up and arranging the small natural materials.
- The child engaged in gross motor skills by going outside to collect the natural materials for the collage.
- The child experienced sensory play as they touched and explored the different textures of the natural materials.
- The child gained physical exercise by moving around and collecting the materials outdoors.

Science

- The child learned about different types of plants and leaves as they collected materials for the collage.
- The child observed and explored the natural materials, developing their senses and curiosity about the natural world.
- The child learned about the concept of recycling and reusing materials by using natural items found in their environment.
- The child learned about the concept of patterns and symmetry as they arranged the materials on the collage.

Social Studies

- The child developed an appreciation for nature and the environment as they collected natural materials for the collage.
- The child learned about different cultures and traditions that incorporate nature and natural materials in their artwork.
- The child learned about the concept of community by discussing and sharing their collage with classmates or family members.
- The child gained social skills and teamwork by collaborating with others to collect materials or create a group collage.

For continued development, encourage the child to explore different natural environments and collect materials for their collages. They can also experiment with different techniques, such as painting or drawing on the collage, to enhance their artistic expression. Additionally, they can research and learn about different artists who incorporate nature into their artwork, inspiring them to create unique and innovative collages.

Book Recommendations

- [The Tiny Seed](#) by Eric Carle: This book tells the story of a tiny seed's journey and teaches children about the life cycle of plants.
- [When Spring Comes](#) by Kevin Henkes: This book explores the changes that occur in nature during the transition from winter to spring, sparking curiosity about the natural world.
- [The Listening Walk](#) by Paul Showers: This book takes readers on a listening walk through nature, encouraging them to pay attention to the sounds and beauty around them.
