

Art

- The child learned about different textures and patterns by collecting and arranging leaves, flowers, and other natural materials.
- They explored color mixing by using different colored petals and leaves in their collage.
- They practiced fine motor skills by cutting and tearing the materials to create different shapes and sizes.
- The child expressed their creativity and imagination by arranging the natural materials in unique and visually appealing ways.

Math

- The child practiced sorting and classifying by categorizing the natural materials based on their shapes, colors, or sizes.
- They learned about symmetry by creating symmetrical patterns in their collage using leaves, petals, and other materials.
- The child explored counting and number recognition by counting the number of materials they used in their collage.
- They developed spatial awareness by arranging the materials in different positions and orientations.

Physical Education

- The child engaged in physical activity by going outdoors to collect the natural materials for their collage.
- They practiced hand-eye coordination and balance while carefully handling and arranging the delicate materials.
- The child developed gross motor skills by moving around and exploring different outdoor environments to find materials.
- They learned about the importance of being active and spending time in nature for their overall well-being.

Science

- The child learned about different types of plants and their characteristics by collecting leaves, flowers, and other natural materials.
- They observed and discussed the changes in nature during different seasons while collecting materials for their collage.
- The child explored the concept of decomposition by observing how the natural materials changed over time.
- They discovered the importance of preserving the environment and taking care of nature through this hands-on activity.

Social Studies

- The child learned about different cultures and traditions by using natural materials commonly used in art from various parts of the world.
- They explored the concept of community by discussing the significance of nature and the environment in our daily lives.
- The child developed an appreciation for nature and the natural world by exploring and collecting materials from their local community.
- They learned about the interconnectedness of all living things and the importance of protecting and preserving nature for future generations.

Continued Development: Encourage children to explore different natural materials and experiment with different art techniques such as painting, stamping, or weaving with natural materials. They can

also learn about different animals and their habitats through nature-inspired art projects. Encourage them to observe and discuss the changes in nature throughout the year and create collages that reflect those changes.

Book Recommendations

- [Nature's Art Box](#) by Laura C. Martin: This book provides creative ideas for using natural materials in art projects.
- [The Curious Garden](#) by Peter Brown: This story follows a boy who transforms an abandoned railway into a vibrant garden, highlighting the importance of nature in urban environments.
- [Up in the Garden and Down in the Dirt](#) by Kate Messner: This book explores the hidden world of plants and animals in a garden throughout the different seasons.
