

Science

- The Second-grade child learned about different animal species and their habitats while playing the Planet Zoo video game.
- They gained knowledge about the basic needs of animals, such as food, water, shelter, and space.
- The child learned about animal conservation and the importance of protecting endangered species.
- They also learned about the different roles of zookeepers and how they care for animals in a zoo setting.

To further develop their understanding of animals and their habitats, the child can engage in activities such as visiting a local zoo or wildlife sanctuary, reading books about animals, or even creating their own animal habitat diorama at home.

Book Recommendations

- [Animals: A Visual Encyclopedia](#) by DK: This book provides a visual guide to various animal species, their habitats, and interesting facts about them.
- [National Geographic Kids Animal Encyclopedia](#) by Lucy Spelman: A comprehensive encyclopedia that introduces young readers to a wide range of animals and their unique characteristics.
