

## Activity: "My child drew a red sun"

### Art

- The child has learned to use colors to represent objects or ideas.
- The child has practiced fine motor skills by holding and manipulating drawing materials.
- The child has explored creativity and self-expression through drawing.
- The child has developed observational skills by observing the sun and trying to recreate it.

### Science

- The child has learned about the sun as a celestial object.
- The child has gained an understanding of the sun's color and appearance.
- The child has explored cause and effect by using red color to represent the sun.
- The child has developed curiosity and a sense of wonder about the natural world.

Encourage your child's creativity and artistic development by providing them with a variety of art materials and opportunities to explore different techniques. Encourage them to experiment with different colors and shapes, and to create their own unique interpretations of the world around them. Display their artwork proudly and provide positive feedback to boost their confidence. Consider taking them to art museums or galleries to expose them to different art styles and inspire their creativity further.

### Book Recommendations

- [The Dot](#) by Peter H. Reynolds: A story about a girl who discovers her artistic talent through a simple dot.
- [Mouse Paint](#) by Ellen Stoll Walsh: A story about three mice who learn about colors by mixing them together.
- [How to Draw a Dragon](#) by Douglas Florian: A step-by-step guide for young children to draw their own dragon.
