

Art

- The child learned about spatial awareness and proportion by building the lego Minecraft house. They had to carefully measure and arrange the blocks to create a realistic structure.
- They explored color theory and design principles as they selected and arranged different colored lego blocks to create various elements of the house.
- The child practiced creativity and imagination by designing and decorating the interior and exterior of the lego Minecraft house, expressing their artistic ideas through the construction.
- They learned about balance and symmetry as they ensured that the structure of the house was stable and visually appealing.

Math

- The child applied basic arithmetic skills such as counting, addition, and subtraction while determining the quantity of lego bricks needed for different parts of the house.
- They practiced measurement and estimation by fitting the lego bricks together to create accurate dimensions for the rooms, walls, and other architectural elements of the house.
- The child learned about geometry as they identified and manipulated different shapes of lego bricks to construct the Minecraft house, understanding concepts like squares, rectangles, and cubes.
- They explored concepts of symmetry and patterns while creating repetitive designs or symmetrical features within the lego Minecraft house.

Encourage further development by challenging the child to create more complex structures or buildings using lego bricks. They can experiment with different architectural styles or create entire Minecraft worlds using lego blocks. Additionally, they can explore the intersection of art and math by designing intricate patterns or mosaics using lego bricks.

Book Recommendations

- [Lego Awesome Ideas](#) by Daniel Lipkowitz: This book provides inspiration and step-by-step instructions for building various lego creations, including houses and buildings.
- [Minecraft: The Island](#) by Max Brooks: This novel takes place in the Minecraft universe and follows the adventures of a character stranded on an island, providing additional inspiration for building lego Minecraft houses.
- [Art for Kids: Drawing](#) by Kathryn Temple: This book introduces basic drawing techniques and encourages creativity, which can be applied to designing and planning lego Minecraft houses.
