

Math

- The Eighth-grade child has learned about various mathematical concepts such as algebra, geometry, statistics, and probability through the CPG maths ks3 workbook.
- They have developed problem-solving skills by working on different math exercises and worksheets.
- They have learned to interpret and analyze data using graphs and charts.
- The child has also improved their understanding of mathematical concepts through practice and application.

Continued development can be enhanced by incorporating real-life examples and scenarios in math problems. Encouraging the use of technology and online resources can also provide interactive learning experiences. Additionally, engaging in math-related activities such as puzzles, games, and competitions can further strengthen mathematical skills and foster a love for the subject.
