

English Language Arts

- The child practiced listening and following instructions during the game.
- They learned new vocabulary words related to dodge ball, such as "dodge," "throw," and "catch."
- They used descriptive language to communicate with teammates during the game.
- The child may have engaged in storytelling or imaginative play while playing dodge ball, enhancing their narrative skills.

Math

- The child practiced counting by keeping track of the number of times they were hit or eliminated during the game.
- They learned about spatial awareness and trajectory while aiming and throwing balls.
- The child may have engaged in basic addition and subtraction by keeping score or tallying points during the game.
- They may have practiced estimation skills by predicting where the ball would go or how many players would be left.

Encourage further development by incorporating dodge ball into language arts activities. For example, have the child write a short story about their dodge ball experience, including descriptive details and dialogue. You can also use dodge ball as a context for word problems in math, asking questions like "If Johnny caught 5 balls and Sally caught 3 balls, how many balls did they catch in total?" This will reinforce both their writing and math skills while making the activity more engaging.
