

Music

- The child has learned about different genres of electronic dance music (EDM) through the gameplay.
- They have developed an understanding of rhythm and timing by tapping on the tiles in sync with the music.
- They have learned to recognize and differentiate between various musical beats and patterns.
- Through the game, they have practiced and improved their hand-eye coordination while following the fast-paced music.

For continued development, the child can explore other EDM songs and artists outside of the game. They can listen to different subgenres of EDM, research the history of EDM, and even try creating their own music using digital music production software.
