History

- The child learned about traditional building materials used in the past, such as sticks and mud.
- They learned about the importance of shelter and how houses have evolved over time.
- They gained an understanding of how early humans used natural resources to build their homes.
- They explored the concept of community and how houses are a part of it.

Physical Education

- By building a house with sticks, the child engaged in physical activity that involved coordination, balance, and dexterity.
- They strengthened their gross motor skills by carrying and arranging sticks to construct the house.
- They developed spatial awareness and problem-solving abilities while assembling the structure.
- They practiced teamwork and communication skills if they collaborated with others during the activity.

Science

- The child learned about the properties of different materials, such as the flexibility and strength of sticks.
- They explored the concept of stability and observed how the arrangement of sticks affected the stability of the house.
- They discovered the importance of a solid foundation for a stable structure.
- They may have observed insects or other wildlife that use sticks to build their homes, leading to discussions about animal habitats.

Social Studies

- The child gained an understanding of different types of dwellings and how they vary across cultures and regions.
- They learned about the importance of homes as a place where families and communities live.
- They may have discussed the roles and responsibilities of family members in maintaining their homes.
- They explored the concept of community planning and how houses are situated in neighborhoods or villages.

Continued development can be fostered by encouraging the child to explore other natural materials for building, such as stones or leaves. They can also be encouraged to research and learn about different types of houses from around the world, expanding their knowledge of cultural diversity. Additionally, engaging in imaginative play where the child acts as an architect or builder can further develop their creativity and problem-solving skills.

Book Recommendations

- <u>Building Our House</u> by Jonathan Bean: A heartwarming story about a family building their own house from scratch, showcasing the importance of teamwork and determination.
- <u>Three Little Pigs</u> by James Marshall: A classic tale where three pigs face the challenge of building houses and outsmarting a persistent wolf.
- <u>Sticks</u> by Diane Alber: This book explores the versatility of sticks and encourages imaginative play with them.
