

Science

- The child learned about the constellations of the zodiac and their names.
- They understood that the constellations are imaginary patterns of stars in the sky.
- The child learned that the constellations of the zodiac have been used for astrological purposes.
- They discovered that the zodiac constellations help determine the path of the Sun across the sky throughout the year.

For continued development related to the activity, encourage the child to explore more about the mythology and stories associated with each zodiac constellation. They can create artwork or write short stories inspired by these constellations. Additionally, they can research how the zodiac constellations were used in ancient civilizations and share their findings with classmates or family members.
