

Art

- The child learned about shapes and spatial awareness while building the magnitile castle.
- They experimented with different colors and patterns when selecting and arranging the tiles.
- Through the activity, the child practiced fine motor skills by handling and placing the tiles.
- They also explored their imagination and creativity by designing their own castle.

Encourage further development by providing the child with additional building materials such as clay or cardboard to create more elaborate castles. They can also experiment with different textures and materials to add more depth and dimension to their creations. Encourage them to tell stories about their castle and create characters using the magnitiles.
