

Physical Education

- The child has learned about spatial awareness and map reading skills by using Google Maps to give directions to the driver.
- They have also developed their ability to think critically and problem solve by determining the most efficient route for the driver to take.
- The activity has provided an opportunity for the child to practice their communication skills as they give clear and concise directions to the driver.
- Additionally, the child has engaged in physical activity by walking or moving around while using Google Maps to navigate.

Social Studies

- The child has gained knowledge about different landmarks, streets, and neighborhoods in their community by using Google Maps for directions.
- They have learned about the importance of maps and how they can be used as a tool for navigation and understanding geographical locations.
- The activity has allowed the child to explore the concept of transportation and how people move from one place to another.
- By using Google Maps, the child has also learned about the concept of distance and how it affects travel time.

After completing the activity, you can continue to develop the child's skills by encouraging them to create their own maps of their neighborhood or a fictional place. They can also practice giving directions to various locations without the use of technology, relying solely on their knowledge of the area. Another creative idea is to have the child create a scavenger hunt using Google Maps, where they provide clues and directions for others to follow.

Book Recommendations

- [Maps and Geography](#) by Ken Jennings: A fun and informative book that introduces children to the world of maps and geography, covering topics such as map types, compasses, and map legends.
- [The Map Trap](#) by Andrew Clements: This chapter book follows the story of two friends who discover a hidden map that leads them on an adventure, teaching them about friendship, problem-solving, and the power of maps.
- [Follow That Map!](#) by Scot Ritchie: A picture book that takes young readers on a journey around the world, exploring different types of maps and how they can be used to navigate and discover new places.
