

Art

- The child learned about shapes and forms by using the magnetic tiles to build a car with different geometric shapes.
- They explored color combinations and patterns by arranging the magnetic tiles in different ways to create a visually appealing car design.
- They experimented with texture by attaching different magnetic tiles to the car, such as smooth tiles for the body and textured tiles for the wheels.
- The child practiced fine motor skills by carefully placing and arranging the magnetic tiles to construct the car.

Science

- The child learned about magnetism and magnetic forces by observing how the magnetic tiles stick together and to metal surfaces.
- They explored the concept of balance and stability by ensuring that the car they built using the magnetic tiles had a sturdy structure.
- They experimented with motion and propulsion by adding wheels to the car and observing how it moved when pushed or pulled.
- The child learned about different materials and their properties by using the magnetic tiles made of plastic and metal.

Social Studies

- The child learned about transportation and vehicles by building a car using the magnetic tiles.
- They explored the concept of teamwork and collaboration if they worked with other children to build a magnetic tile car together.
- They may have discussed the importance of following rules and safety precautions while building and playing with the magnetic tile car.
- The child may have imagined and role-played different scenarios involving the magnetic tile car, promoting creativity and storytelling.

To further develop the child's skills and knowledge related to this activity, you can encourage them to:

- Experiment with different designs and shapes when building the magnetic tile car.
- Introduce elements of storytelling by creating characters and scenarios involving the magnetic tile car.
- Explore other forms of transportation and discuss their features and purposes.
- Research and learn about famous cars or inventors in history.

Book Recommendations

- [The Car Book](#) by Nancy Loewen: A simple book that introduces young readers to different types of cars and their uses.
- [How Do Vehicles Work?](#) by Lynn Stone: This book explains the basic principles behind how different types of vehicles work, including cars.
- [My Car](#) by Byron Barton: A colorful and engaging picture book that follows a young boy and his car as they go on various adventures.
