

## English Language Arts

- The child has learned how to identify and form words by rearranging given letters in the word puzzles.
- They have developed their vocabulary as they encounter new words and their meanings in the app.
- The activity has improved their spelling skills as they need to correctly spell words to progress in the game.
- By solving the puzzles, the child has also gained practice in critical thinking and problem-solving.

For continued development, encourage the child to explore other word puzzle games or activities that involve wordplay. They can try creating their own word puzzles for their friends or family to solve, or even participate in spelling bees or word games competitions. Additionally, they can engage in reading books with challenging vocabulary to further expand their word knowledge.
