

## Physical Education

- The child developed gross motor skills by climbing, swinging, and balancing on the jungle gym.
- They improved their coordination and body awareness as they maneuvered through the different obstacles.
- The child strengthened their muscles and increased their physical fitness through active play on the jungle gym.
- They learned to follow safety rules and understand the importance of playground etiquette.

## Science

- The child explored the concept of gravity as they experienced the feeling of being pulled downwards while on the jungle gym.
- They observed cause and effect by realizing that pushing or pulling certain parts of the jungle gym led to movement or changes in their position.
- The child learned about materials and their properties as they interacted with the different textures and surfaces of the jungle gym.
- They gained knowledge of their surroundings by discovering the natural elements present in the outdoor environment while playing on the jungle gym.

Encourage continued development related to this activity by providing opportunities for the child to engage in outdoor play regularly. Set up obstacle courses or create mini jungle gyms using safe and age-appropriate materials. Encourage them to explore different movements and challenges, allowing them to develop their physical skills further. Additionally, incorporate discussions about gravity and materials during playtime to reinforce the scientific concepts they encountered on the jungle gym.
