

## Physical Education

- The child learned strategic thinking and problem-solving skills by planning their moves and anticipating their opponent's moves in the game.
- They developed hand-eye coordination and motor skills by placing their game pieces accurately into the slots on the board.
- Connect 4 also helped improve their concentration and focus as they had to pay attention to the game board and their opponent's moves.
- The activity promoted social interaction and teamwork as the child played against another person, learning sportsmanship and fair play.

For continued development related to Connect 4, encourage the child to participate in mini-tournaments with friends or family members. They can even create their own variations of the game by using different colored game pieces or modifying the rules slightly. This will enhance their creativity, critical thinking skills, and adaptability.

## Book Recommendations
