

## Activity: Typing

### English Language Arts

- The child has improved their typing speed and accuracy by practicing regularly.
- They have developed their spelling and vocabulary skills through typing various words and sentences.
- The activity has helped them become more familiar with punctuation and proper sentence structure.
- By typing short stories or essays, they have enhanced their writing skills and improved their ability to express their thoughts coherently.

### Science

- During the activity, the child has gained knowledge about the mechanics of a keyboard and how each key corresponds to a specific character or function.
- They have learned about the importance of ergonomics and proper posture while typing to prevent strain and injuries.
- Through online typing games or exercises, they have explored the concept of muscle memory and how it relates to typing proficiency.
- They have also become familiar with computer science terms such as "QWERTY" keyboard layout and "touch typing" technique.

Encourage the child to continue developing their typing skills by exploring different typing programs or games that offer more challenging exercises. They can also try typing out longer texts, such as book excerpts or articles, to improve their endurance and typing fluency. Additionally, they can practice typing without looking at the keyboard to further enhance their muscle memory.
