

Art

- The child learned about set design and construction by creating and painting backdrops for the SpongeBob musical.
- They developed their creativity and artistic skills by designing and making costumes for the characters in the musical.
- The child learned about stage lighting and how to create different atmospheres through the use of different lighting techniques.
- They explored the concept of choreography and movement by creating dance routines for the musical numbers.

Continued development in art can involve exploring other aspects of theater production, such as sound design and prop making. The child can also experiment with different art techniques and styles to further enhance their creativity and artistic abilities.
