

## **Art**

- The Sixth-grade child learned about different art techniques used in creating visual representations of sea animals.
- They explored color mixing to recreate the vibrant colors of marine life.
- They learned about the importance of proportion and scale when drawing or painting animals accurately.
- They practiced observational skills by closely studying the animals at SeaWorld and translating their observations into artwork.

## **English Language Arts**

- The child developed their descriptive writing skills by creating detailed narratives or poems inspired by their interactions with the animals at SeaWorld.
- They expanded their vocabulary by learning new words related to marine life and animal behavior.
- They practiced their reading comprehension skills by independently researching and reading informational texts about the animals they encountered.
- They worked on their public speaking skills by sharing their experiences and knowledge with their classmates or family members.

## **History**

- The child learned about the history and evolution of SeaWorld as an organization and its contributions to marine conservation.
- They explored the historical significance of marine animals in different cultures and societies throughout history.
- They studied the impact of human activities on marine ecosystems and the importance of conservation efforts.
- They gained an understanding of the historical context surrounding the animals they encountered at SeaWorld.

## **Math**

- The child practiced measurement skills by estimating and comparing the sizes and weights of different sea animals.
- They learned about data collection and analysis by recording and organizing information about the animals' characteristics.
- They used mathematical calculations to understand concepts like animal growth rates or habitat sizes.
- They applied geometry skills by examining the shapes and patterns found in marine life and incorporating them into their artwork.

## **Science**

- The child learned about the biology and anatomy of various sea animals, including their physical adaptations and behaviors.
- They gained knowledge about different marine habitats, ecosystems, and the interconnections between species.
- They explored the concepts of food chains and food webs by studying the relationships between predators and prey in aquatic environments.
- They learned about conservation efforts and the importance of protecting marine biodiversity.

## **Social Studies**

- The child explored the geographic distribution of different sea animals and how their habitats

are influenced by climate and other factors.

- They learned about different cultures and their relationship with marine life, including indigenous communities and their reliance on the ocean.
- They studied the impact of human activities on marine environments and the importance of sustainable practices.
- They gained an understanding of the social and ethical considerations surrounding marine animal captivity and conservation efforts.

Continued development related to this activity can include encouraging the child to create their own mini SeaWorld exhibit at home, using various art mediums to showcase the animals they encountered and researching more about their habitats and conservation efforts. They can also write and illustrate their own informational booklet about a specific sea animal, incorporating their learnings from the activity. Additionally, engaging in discussions or debates about the ethical considerations of marine animal captivity and conservation can foster critical thinking and empathy.

### **Book Recommendations**

- [Whale Talk](#) by Chris Crutcher: A powerful novel that explores the themes of friendship, identity, and social justice through the story of a high school swim team and their bonding with a killer whale at a marine park.
- [Swim That Rock](#) by John Rocco and Jay Primiano: Set in a coastal town, this adventure-filled book follows a young boy who becomes entangled in a scheme to save the local aquarium and its marine animals.
- [Manfish: A Story of Jacques Cousteau](#) by Jennifer Berne and Eric Puybaret: A beautifully illustrated picture book biography that introduces young readers to the life and accomplishments of the famous explorer and marine conservationist, Jacques Cousteau.
