

Art

- The First-grade child learned about shapes and forms by manipulating and connecting the stickle bricks to create various structures.
- They explored different colors and patterns by selecting and combining stickle bricks of different hues and textures.
- They developed their fine motor skills by carefully placing and interlocking the stickle bricks.
- The child expressed their creativity and imagination by building unique and original designs with the stickle bricks.

For continued development, encourage the child to experiment with different arrangements and combinations of stickle bricks to create more complex structures. They can also try incorporating other materials like paper or fabric to add texture and dimension to their creations. Encourage them to explore different themes or stories that can be represented through their stickle brick designs.

Book Recommendations

- [The Shape of Things](#) by Dayle Ann Dodds: This book introduces different shapes through playful rhymes and illustrations, encouraging children to think creatively about the world around them.
