Foreign Language

- The child learned basic vocabulary and phrases in a foreign language through interactive games and exercises.
- They practiced pronunciation by listening to audio recordings and repeating the words and sentences.
- They gained an understanding of cultural aspects related to the foreign language through stories and videos.
- They developed their reading skills by reading simple texts in the foreign language and answering comprehension questions.

Math

- The child improved their number sense by solving math problems involving addition, subtraction, multiplication, and division.
- They learned about fractions and decimals and how to represent them using visual models.
- They practiced problem-solving skills by completing word problems that required applying math concepts to real-life situations.
- They strengthened their critical thinking skills by analyzing data and creating graphs and charts.

To continue developing literacy and numeracy skills, encourage the child to engage in activities that combine reading and math. For example, they could read books that involve puzzles or mysteries, where they need to use their math skills to solve problems or unravel clues. Another idea is to have them write short stories or poems that incorporate mathematical concepts or use numbers as themes. This will help them see the practical applications of math in creative ways.

Book Recommendations

- [The Number Devil](#) by Hans Magnus Enzensberger: A fascinating journey through the world of numbers, where a young boy explores mathematical concepts with a mischievous character.
- [The Phantom Tollbooth](#) by Norton Juster: A whimsical adventure that combines wordplay and mathematical puzzles, as a young boy named Milo explores a magical land.
- [The Joy of X: A Guided Tour of Math, from One to Infinity](#) by Steven Strogatz: An engaging exploration of various mathematical topics, presented in an accessible and entertaining way.
